Arjun Chakravarthy Nunugonda

Senior Software Engineer

+91-8897566013 | arjunchakri@gmail.com | arjunchakri.github.io | linkedin.com/in/arjunchakravarthy

Summary

Senior Software Engineer with over 8 years of expertise in scalable backend architectures, microservices, and AI-driven integrations. Skilled in cloud-native platforms, search intelligence, DevOps automation, and high-performance distributed systems.

Work Experience

Walmart Inc. **09/2021 – Present**

Senior Software Development Engineer *Bangalore, Karnataka, India*

- Designed and implemented microservices-based WMS backend solutions in Java Spring Boot, improving DC operational efficiency and automation across Walmart's Supply Chain Technology division.
- Enhanced WMS functionalities across inbound (slotting, receiving) and outbound (picking, fulfillment) workflows, including financial reconciliation and inventory control.
- Led end-to-end design and deployment of DC launches via REST APIs; proactively resolved ∼15 DC issues per week during hypercare to maintain continuous warehouse operations.
- Integrated API-driven AI capabilities into Honeywell's voice-assisted framework using Python services on GCP, enabling NLP-powered execution of warehouse tasks.
- Spearheaded warehouse mechanization by integrating Automated Storage & Retrieval Systems (AS/RS) via a distributed Azure architecture, boosting operational efficiency by 300%.
- Re-architected a critical supply chain component using a cloud-based master-node architecture, delivering a 400x performance improvement in order processing.

FactSet Research Systems Inc. **06/2018 – 09/2021**

Software Development Engineer III *Hyderabad, Telangana, India*

- Optimized large-scale search by implementing AI-powered Elasticsearch indexing, reducing query time from hours to milliseconds and making glacier data searchable.
- Developed an AWS Lambda-powered monitoring system integrated with MS Teams for real-time AWS resource tracking, saving $4,000/month in operational costs.
- Implemented containerized troubleshooting environments with Docker, streamlining testing efficiency and reducing infrastructure dependencies.
- Actively contributed across the full SDLC including product specifications, system design, coding, code reviews, testing, and DevOps automation.

Projects

Self-Hosted GenAI Infrastructure | *Docker, Llama 3.1, Open WebUI*

- Architected a private LLM environment using Docker & Llama 3.1 to enable cost-free intelligence and secure local inference; deployed Dockerized Open WebUI for seamless interaction.

IntelliShop Personalization Engine | *Android SDK, Geofencing, Machine Learning*

- Engineered a context-aware personalization engine using Geofencing & Android SDK, delivering real-time predictive product recommendations that increased user engagement by 20%.

Liquibase Automation Framework | *Liquibase, Database DevOps, CI/CD*

- Implemented Database DevOps, automating schema migrations and versioning to ensure near-zero discrepancies across multi-region deployments.

Technical Skills

Backend & Cloud: Java, Spring Boot, Microservices, RESTful APIs, AWS/Azure Lambda, SQL, S3, Sockets
AI, Search & GenAI: Generative AI, Cognitive Search, Computer Vision, LLM (Llama 3), Ollama, Vector DB, RAG, Elasticsearch
DevOps & Tools: Docker, Kubernetes, Kafka MQ, Liquibase, Sonar, Heroku, Jenkins, GitHub, Groovy, Kibana, CI/CD/CT
Soft Skills: Effective Communication, Proactive Problem-Solving, Fast-Paced Adaptability, Collaborative Teamwork

Awards & Recognitions

Excellence & Bravo Awards | *Walmart Inc. – Ranked in top 2% of department performers with 2 Excellence + 4 Bravo awards* **2023 – 2026**

Badgify Recognitions | *Walmart Inc. – Ranked among the top 3 most awarded employees in a row in the department* **2022 – 2026**

Hackathon Contributions | *Secured top placement developing GenAI & RAG applications for real-time decisions* **2023 – Present**

Education

Jawaharlal Nehru Technological University **2014 – 2018**

Bachelor of Technology in Computer Science *Hyderabad, Telangana, India*
